

## Thank you for your Interest in WEHRHAHN Equipment and AAC Technology

### About WEHRHAHN

WEHRHAHN - established in 1892 - has a proud history of almost 120 years and specialises on design, manufacture and supply of industrial plants for the production of construction materials, such as

- AAC (Autoclaved Aerated Concrete blocks and panels)
- Fibre Cement Boards
- Dry Mix Mortar

### WEHRHAHN Automation

The automatic division has over 50 dedicated electric and electronic engineers to provide all types of electric control systems for automatic plant operation and data processing. This includes controls, software, motor control centres, scada systems for data collections and process optimisation.

**WEHRHAHN AAC machines and technology in almost 100 AAC plants  
all over the globe**

100 plants mean hundredfold experience. A valuable asset available to operating clients and new investors.

### WEHRHAHN's Philosophy:

*Supply always the best  
and provide great value for money*

A number of satisfied clients operate several WEHRHAHN plants already after having purchased the first one.
