

Thank you for your Interest in WEHRHAHN Equipment and Fibre Cement Technology

About WEHRHAHN

WEHRHAHN - established 1892 - has a proud history of over 115 years and specialises on design, manufacture and supply of industrial plants for the production of construction materials, such as

- Fibre Cement Boards
- AAC (Autoclaved Aerated Concrete blocks and panels)
- Dry Mix Mortar

WEHRHAHN Automation

The automatic division has over 50 dedicated electric and electronic engineers to provide all types of electric control systems for automatic plant operation and data processing. This includes controls, software, motor control centres, scada systems for data collections and process optimisation.

WEHRHAHN fibre cement machines and technology in more than 100 fibre cement plants all over the globe.

100 plants mean hundredfold experience. A valuable asset available to operating clients and new investors.

WEHRHAHN's Philosophy:

*Supply always the best
and provide great value for money*

A number of satisfied clients operate several WEHRHAHN plants already after having purchased the first one.
